

A man with curly hair, wearing a black t-shirt, dark shorts, black socks, and orange and black running shoes, is captured in a dynamic running pose on a rocky, uneven trail. He is looking forward with a focused expression. The background features lush green trees and a clear sky. The overall scene conveys a sense of outdoor fitness and adventure.

Trail Running

EXTERNAL QUICK-FIT

External quick-fit heel pull allows the shoe to be pulled on more easily

UPPER

Abrasion resistant and breathable mesh with TPU reinforcements. **High breathability** keeps feet dry and comfortable. **Padded collar** and **extreme heel cup** for safety and security

SOLE

Features **ATOM GRIP**, a high performance compound that ensures great grip. **Bi-directional 4.5 mm lugs** ensure grip on both uphill and steep descents

PROTECTIVE TOE CAP

TPU toe cap absorbs impact, offering protection against rocks, branches and other terrain hazards

- 1.** **Bi-Density midsole** that helps cushion the foot on uneven terrain. Strategically designed with different materials to provide both cushioning and rigidity
- 2.** **Suitable** for all types of terrain. Designed to withstand different weather conditions thanks to their quick-drying design, and great breathability that keeps feet at a pleasant temperature
- 3.** **Flexible strap** perfect for storing laces to prevent them from causing any problems during competition or demanding training sessions.

BI-DENSITY

The **Bi-Density midsole** helps to cushion the foot on uneven terrain.

Strategically designed with different materials to provide both cushioning and rigidity. **The high density part** of the midsole provides support and protection while the low density part provides great comfort and makes the stride softer

LOW DENSITY PART

HIGH DENSITY PART

INNER SOLE RUBBER

The inner sole rubber has a softer density for increased traction

OUTER SOLE RUBBER

The outer sole rubber has a higher density that increases the shoe's durability

ATOM GRIP

It features **ATOM GRIP**, a high performance compound that guarantees great grip. The bi-directional 4.5mm lugs guarantee grip on both climbs and steep descents.

Designed to provide maximum grip, minimum weight, and optimum stability on uneven terrain

CHOOSE YOUR ROUTE AND FIND YOUR PEAK. THIS TRAIL RUNNING SHOE ALLOWS YOU TO RUN IN DRY OR WET TERRAIN.

DROP	8 mm	Stud Height	4.5 mm
Material	Textil	Men's Weight	321 gr.
External profile	43-26 mm	Women's Weight	265 gr.
Inner profile	26- 18 mm			

Trail Running

MIDSOLE

Its midsole is designed with **Low Density (LD)** technology to increase the levels of cushioning, reactivity and lightness.

UPPER

Specially designed mesh for **comfort and durability**. High breathability to keep feet dry and comfortable even when walking long distances in adverse conditions

SOLE

Featuring ATOM GRIP, a high level grip and durability system with 4.5mm lugs, inspired by the Enduro Extreme tire. Peak performance and responsiveness to terrain

PROTECTIVE TOE CAP

TPU toe cap absorbs impact, offering protection against rocks, branches and other terrain hazards

1.

To provide consistent heel protection, this model includes **stabilizers** that make the shoe more solid over distances and ensures correct biomechanics

2.

DoubleFoam is a lightweight material that helps to cushion the foot on uneven terrain. Strategically designed using different materials that provide cushioning and energy to the foot. The hindfoot area absorbs heel impact more effectively while the forefoot improves rebound

3.

External quick-fit heel puller to allow the shoe to fit much more easily and the lacing area is protected by TPU

MR74

ENDURO ROMAN

This shoe was designed in collaboration with **Mario Roman**, the Extreme Enduro world champion. Enduro and Trail unite to create a shoe that guarantees maximum grip

LINK TO VIDEO:

ATOM GRIP

Featuring ATOM GRIP, a high level grip and durability system with 4.5mm lugs inspired by the Enduro Extreme tire

The sole is composed of chloroprene (a material used in climbing shoes), which allows for exceptional grip performance

The pyramid shaped lugs are designed to minimize mud and dirt retention, ensuring maximum grip

FLEXORS

Flexors are bi-directional cuts that increase flexibility and adaptability.

The brand's R+D+I department has included these elements in the metatarsal part of the forefoot for even greater benefits.
